Invites you to a seminar by

**STEFAN WAWZYNIECKI**  
Environmental Health & Safety Manager

**LABORATORY SAFETY & HAZARDOUS WASTE MANAGEMENT**

OSHA regulates safety in the workplace, and has established a regulation for exposures to chemicals in the laboratory. EPA regulates how those chemicals should be managed after they have been used, and when they are no longer needed. This seminar explains both, and discusses how the University complies with these regulations.

This seminar is mandatory for new grad students / TA's / faculty & staff. Researchers should attend as a refresher, annually.

**FRIDAY, August 31, 2012**

**INSTITUTE OF MATERIAL SCIENCE BUILDING, Room 20 at**

11:00 a.m.

*Refreshments will be served at 10:45 a.m.*
