Industrial Air Flow Dynamics, Inc. is a manufacturing and construction company based in Glastonbury, CT. IAFD does business nationally & internationally in the power generation industry, specifically fossil fuel burning power plants. Their manufactured products, expansion joints, are made from a wide range of materials that are installed in the duct work at these plants. They are applied in hot, cold, corrosive, high vibration and large thermal growth environments. Since its creation in 2001, IAFD has focused on customer satisfaction, a driving force behind their innovation efforts.
